### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Lack of Unity-Election of Species***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1 as directed to a driving device including a driving unit.

Species 2 as directed to a milking area within the circular cowshed.

Species 3 as directed to a part of the milking area located outward of circular cowshed.

Species 4 as directed to a loafing area including a resting area.

Species 5 as directed to a milking area having multiple milking places.

Species 6 as directed to a milking area having side by side parlors.

Species 7 as directed to a milking area including an automated milking system.

Species 8 as directed to a milking area having a through passage and automatic gate.

Species 9 as directed to having at least one selection sector.

Species 10 as directed to having at least one animal identifier.

Species 11 as directed to the cowshed having at least one walkway.

Species 12 as directed to a circular cowshed having at least one alley extending in a radial direction.

Species 13 as directed to at least one feeding area between two adjacent resting areas.

Art Unit: 3643

Species 14 as directed to having a pre-waiting enclosure in front of the milking area.

Species 15 as directed to having an automated cleaning mechanism.

Species 16 as directed to an automated bedding spreader.

Species 17 as directed to having a logic unit.

Species 18 as directed to a cowshed having a tent shaped roof.

Species 19 as directed to at least two cowsheds share at least one common milking area.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species 1 as claimed in claims 2 and 3.

Species 2 as claimed in claim 4.

Species 3 as claimed in claim 5.

Species 4 as claimed in claims 6 and 7.

Species 5 as claimed in claim 8.

Art Unit: 3643

Species 6 as claimed in claim 9.  
Species 7 as claimed in claim 10.  
Species 8 as claimed in claim 11.  
Species 9 as claimed in claim 12.  
Species 10 as claimed in claim 13.  
Species 11 as claimed in claim 14.  
Species 12 as claimed in claim 15.  
Species 13 as claimed in claim 16.  
Species 14 as claimed in claim 17.  
Species 15 as claimed in claims 18-21.  
Species 16 as claimed in claims 22 and 23.  
Species 17 as claimed in claim 24.  
Species 18 as claimed in claim 25.  
Species 19 as claimed in claims 26 and 27.

The following claim(s) are generic: claim 1 is generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each species listed includes a special technical feature which is different from the remaining species listed.

A telephone call was made to Jeffrey Smith on January 6, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
